TECHNICAL CLARIFICATION TO HNF-EP-0063, REV. 7, SECTIONS 2.9 AND 7.5.7

The Waste Receiving and Processing Facility (WRAP) has requested a technical clarification to Sections 2.9 (*Waste Verification*) and 7.5.7 (*Package Weight Limits*) of the Hanford Site Solid Waste Acceptance Criteria (HNF-EP-0063, Rev. 7). WRAP environmental self-inspection (#W1-ENV-02-4), performed in April 2002, identified an inconsistency in the kilogram (kg)/pound (lb) conversion for the maximum container weight limit described in Sections 2.9 and 7.5.7. The 7,000 lb container weight limit kg conversion shall read 3,175 kg instead of 3,180 kg.

The Waste Management Project acceptance organization concurs with the WRAP box weight limit technical clarification. The clarification does not affect compliance with applicable regulations and RL and/or regulatory agency approved documents. This clarification applies to all generators and will be posted on the Hanford Site Solid Waste Acceptance Program website and incorporated into HNF-EP-0063, Rev. 8, which is scheduled for release in April 2003.

If you have any questions, please contact J. B. Bolles on 376-1073.
